# Technical <u>Debt</u> can be unintentional

- Technical Debt can be unintentional, caused by inexperience or lack of education into design patterns.

- I hypothesize that an <u>excessive reliance on AI</u> without <u>understanding the code</u> we write could very well result in technical debt.

Reckless | Prudent

"We don't have time for design" | "We must ship now and deal with consequences"

Deliberate

Inadvertent

"What's Layering?" | "Now we know how we should have done it"

The Different Types of Technical Debt
